Contents

I	The First Chapter	7
II	The Second Chapter	13
III	The Third Chapter	19
IV	The Fourth Chapter	25
V	The Fifth Chapter	31
VI	The Sixth Chapter	37
VII	The Seventh Chapter	43
VIII	The Eighth Chapter	49

Introduction

This book is created with "L^AT_EX-Handouts Builder", a Python script to create L^AT_EX-beamer based course handouts.

More info: <http://jeroendoggen.github.com/latex-handouts-builder/>

What is it does:

- Build multiple L^AT_EX beamer slide sets with one command: "python build.py"
- Convert the slides to printer-friendly format without slide transitions and with less colors

Compact 6 slides per page

Notes 3 slides per page + blank lines for note taking

Large 2 slides per page

- Build three versions of a main "course handouts book" with all the slides (one chapter per beamer slide set, title page, introduction, table of contents,...)
- Create a .zip archive with all the pdf documents

The scripts starts multiple processes in parallel to build all slide sets at the same time. This results in a big speedup on multi-core systems.
